

YOU'VE WAITED **LONG ENOUGH**

FOR A NEW PERFORMANCE RECORD

NEW SUPER-FAST SURFACER AND PRETREATMENT WIPES FROM CROMAX

PS1081, PS1084, PS1087 Ultra Performance Energy Surfacers and PS1800 Metal Pretreatment Wipes redefine the pretreatment process. Based on cutting-edge technology, these innovations set a new benchmark in productivity, delivering increased throughput. Featuring an easy application without flash-off times, very fast air-drying and smooth surface they can be combined with Cromax Pro Basecoat and Ultra Performance Energy Clear CC6700 to achieve an unbeatable all-round performance.

**“WOW! WE SAVE
AROUND ONE
HOUR PER CAR” ***

* Save one hour process time compared to a standard air-drying surfacer.

Thanks to the unique patented technology that uses humidity in the air to speed up the drying process, PS1081, PS1084 and PS1087 Ultra Performance Energy Surfacer dries faster than any other air-drying surfacer. This means unparalleled performance and even greater productivity for your business.

With groundbreaking new chemistry, the PS1081, PS1084 and PS1087 Ultra Performance Energy Surfacer delivers an improved preparation process. Applied without flash-off times and featuring impressive air-drying performance, the new Ultra Performance Energy Surfacers are also ultra energy-savers.

- Sag-resistant application without flash-off, up to four coats.
- Excellent drying performance: it can be sanded after only 20-40 minutes air-drying. IR and low bake with shortest drying times are possible too.
- Any number of spots, jobs or parts and any type of repair size can be handled simultaneously, due to simple air-drying.
- The smooth surface provides a high-quality appearance with an outstanding gloss hold-out after top coating.
- Simple 1:1 mixing ratio with AR7802 Energy Surfacer Activator.
- Part of the ValueShade® concept: available in white (VS1), grey (VS4), and black (VS7).

The PS1800 Metal Pretreatment Wipes are required when using Ultra Performance Energy Surfacer on metal substrates. Based on a special acid chemistry the wipes are ready-to-use and allow an easy wipe-on application.

- Provide excellent adhesion and corrosion protection.
- Easy to use, compared to mixed products: no pot life problems, no spray gun cleaning and no overspray.
- Reduced flash-off times compared to standard acid primers.
- Metal Pretreatment Wipes are very efficient - one wipe can cover approximately 2m².

Combining the Ultra Performance Energy Surfacer with the Ultra Performance Energy Clear CC6700 increases energy efficiency even further. This duo will bring your energy costs to a new low and your performance to a new high.

FAST REPAIRS

The new Ultra Performance Energy Surfacer is also part of the Fast Repair concept. It offers an easy and quick solution for minor repairs such as small dents and scratches.

Increased productivity:

- Reduction of labour time.
- Reduction of used materials.

Fast Repair
SMALL REPAIRS FOR BIG RESULTS

METAL PRETREATMENT WIPES AND ULTRA PERFORMANCE ENERGY SURFACER A NEW PERFORMANCE RECORD

Our new Ultra Performance Energy Surfacers are incredibly fast air-drying, while providing outstanding gloss and hold-out after top coating.

The ultra-fast drying properties result in a speedier and more flexible process as well as saving energy. Used in combination with the Metal Pretreatment Wipes this means even more process efficiency with reduced flash-off times and less material and equipment handling.

Overall the Ultra Performance Energy Surfacers and Metal Pretreatment wipes set a new standard for productivity and performance.

Cromax® delivers increased productivity from the front of the bodyshop to the back with coatings systems engineered for easy, quick and accurate application. Localised business and marketing support solutions and pragmatic innovations simplify and expedite the refinish process. Cromax® helps bodyshops drive their business forward.
