

CLOSER TO PERFECTION

Even the most eagle-eyed refinisher can use a helping hand to achieve perfection. Our accurate and innovative colour tools help you to realise the best possible results while improving your profitability. At the forefront of the colour technology and trends, Cromax always sets the highest standards of consistent, reliable colour matching.

Our colour tools are linked to a global database. This ensures that colour formulas and colour-related information, including OEM trends, new pigment technology and colour variations from the field, are always available to you. Regardless of the repair, the colour, or the age of the vehicle, there is a Cromax colour tool to help you quickly and accurately find the right colour formula and identify the effect.
